

## Indonesia's Bioeconomy: Maximising Sustainable Marine Biodiversity Utilisation 2024

The BRIN-KONEKSI Joint Call is a special initiative designed to forge research partnerships that generate knowledge to support policy and innovation. This initiative will be jointly delivered by Australia and Indonesia. The purpose is to support partnerships between Australian and Indonesian knowledge organisations to carry out and disseminate high-quality, multidisciplinary applied research that responds to the priorities of the Indonesian Government.

**BRIN-KONEKSI**

Joint Call for Proposals

The objectives of **CfP Indonesia's Bioeconomy: Maximising Sustainable Marine Biodiversity Utilisation 2024** are to:

Explore technology and practices to enhance and ensure the sustainability of the biodiversity of marine resources in relation to food, health, and energy

Understand approaches to and impacts of utilisation and how to ensure sustainable benefits for all

Identify, explore, and develop the sustainable utilisation of marine biodiversity, including research and technology

Understand, guide, and direct the local and national policies, regulations and strategies required to effectively manage and distribute the benefits from marine biodiversity utilisation

In this grant round – CfP Indonesia’s Bioeconomy: Maximising Sustainable Marine Biodiversity Utilisation 2024 – KONEKSI and BRIN are interested in funding research on technologies, practices and products that utilise marine biodiversity and systems sustainably. KONEKSI and BRIN welcome research proposals on the three focus area of marine biodiversity and sustainability in the food, health, and energy sectors.

The **CfP Indonesia’s Bioeconomy: Maximising Sustainable Marine Biodiversity Utilisation 2024** will not support:

Research that does not involve collaboration between Australia and Indonesia

Research that is not applied research with clear impact and outcomes

Research that is based outside of either Australia or Indonesia

Research that focuses solely on Biodiversity, without consideration of Gender Equality, Disability and Social Inclusion (GEDSI) in the research process and outcomes

## Stage 1
